

AIR POLLUTANTS ANALYSIS

O₂ NO_x
NH₃ SO₂ HC
NO
CO CH₄ NO₂

WE CAN ALSO DO:

- ✓ Soot measurement
- ✓ Draft measurement

Do you need a high precision real time gaseous emission characterization done for you? We offer high quality gaseous analysis using latest sensor technology designed to measure flue gases on boilers, burners, engines, turbines, plants, chemical industries, refineries and everywhere Gas analysis is required.

Generation Of Reports For:

- ✓ Air pollutants characterisation and analysis
- ✓ Compliance reports for licensing with regulatory authorities
- ✓ Sustainability reporting
- ✓ Combustion efficiency analysis

Benefits of Using Our Combustion Gas Analyser

- ✓ Reducing production costs and increase efficiency through combustion analysis.
- ✓ Measuring emissions for preparation of sustainability reporting.
- ✓ Air pollution control.
- ✓ Assessing combustion efficiency including internal combustion engines for vehicle and off road vehicles.
- ✓ Measuring effectiveness of company efforts in emission reduction
- ✓ Assessing occupational hygiene measurements.
